

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

- 202-61
R3
1. (Original): A method for sending a pre-selected portion of a document to a recipient via electronic mail comprising the steps of:
receiving a pre-selected portion of a document;
receiving a command to send the pre-selected portion of the document to a recipient via electronic mail; and
in response to receiving the command to send the pre-selected portion of the document, coding the pre-selected portion of the document for transmission via electronic mail; and
sending the coded pre-selected portion of the document to the recipient via electronic mail.
 2. (Original): The method of Claim 1, further comprising the steps of:
determining content in the pre-selected portion of the document; and
in response to determining the content, changing a user interface to correspond with the content.
 3. (Original): The method of Claim 1, wherein coding the pre-selected portion of the document comprises coding the pre-selected portion into HTML.
 4. (Original): The method of Claim 1, wherein sending the coded pre-selected portion of the document to the mail client via electronic mail comprises:
launching an electronic mail application program; and
inserting the coded pre-selected portion of the document into an e-mail message.
 5. (Original): The method of Claim 2, wherein the command to send the pre-selected portion to a recipient via electronic mail is received through the user interface.

6. (Original): The method of Claim 2, wherein the user interface comprises a send button that corresponds to content of the pre-selected portion of the document and changes in response to the content of the pre-selected portion.

7. (Original): The method of Claim 1, wherein the pre-selected portion of the document comprises a data range comprising a single cell or multiple cells.

8. (Original): The method of Claim 1, wherein the pre-selected portion of the document comprises a table or pivot table.

9. (Original): The method of Claim 1, wherein the pre-selected portion of the document comprises a chart or pivot chart.

10. (Original): The method of Claim 1, wherein the pre-selected portion of the document comprises a graphic or other object.

11. (Original): The method of Claim 1, wherein the document comprises a spreadsheet document or file.

12. (Original): The method of Claim 1, wherein the document comprises a word processing document or file.

13. (Original): The method of Claim 4, further comprising the steps of:
detecting a command to apply an interactive control to the pre-selected portion of the document; and
in response to receiving the command to apply the interactive control to the pre-selected portion,
coding an interactive control for the pre-selected portion; and
sending the interactive control to the recipient.

14. (Original): The method of Claim 13, further comprising the steps of:
inserting the coded interactive control into the e-mail message with the coded pre-selected portion of the document so that a recipient can apply the interactive control to the pre-selected portion.

15. (Original): The method of Claim 13, wherein the interactive control comprises an ActiveX control.

16. (Original): The method of Claim 13, wherein the interactive control comprises information to enable the recipient viewing the content of the pre-selected portion to manipulate the content.

17. (Original): The computer-readable medium of Claim 13, wherein the interactive control provides functionality for filtering, sorting, calculating, pivoting, and charting.

18. (Original): The method of Claim 13, wherein the interactive control comprises a spreadsheet application program function.

19. (Currently Amended) ~~In or for a~~ A computer system comprising a processing unit, a user input device coupled to the processing unit, a memory coupled to the processing unit, a display device coupled to the processing unit, and an application program running on the processing unit, for sending a pre-selected portion of a document to a recipient via electronic mail, operable to perform the steps:

receiving a pre-selected portion of a document;

receiving a command to send the pre-selected portion of the document to a recipient via electronic mail; and

in response to receiving the command to send the pre-selected portion of the document,

coding the pre-selected portion of the document for transmission via electronic mail, and

sending the coded pre-selected portion of the document to the recipient via electronic mail.

20. (Original): The computer system of Claim 19, further comprising the steps:
determining content in the pre-selected portion of the document; and
in response to determining the content,
changing a user interface to correspond with the content.

21. (Original): The computer system of Claim 19, wherein the step of coding the
pre-selected portion of the document comprises coding the pre-selected portion into HTML.

22. (Original): The computer system of Claim 19, wherein the step of sending the
coded pre-selected portion of the document to the recipient via electronic mail comprises the
steps:
launching an electronic mail application program; and
inserting the coded pre-selected portion of the document into an e-mail message.

23. (Original): The computer system of Claim 20, wherein the command to send
the pre-selected portion to a recipient via electronic mail is received through the user interface.

24. (Original): The computer system of Claim 20, wherein the user interface
comprises a dynamic send button that corresponds to content of the pre-selected portion of the
document and changes in response to the content of the pre-selected portion.

25. (Original): The computer system of Claim 19, wherein the pre-selected
portion of the document comprises a data range comprising a single cell or multiple cells.

26. (Original): The computer system of Claim 19, wherein the pre-selected
portion of the document comprises a table or pivot table.

27. (Original): The computer system of Claim 19, wherein the pre-selected
portion of the document comprises a chart or pivot chart.

28. (Original): The computer system of Claim 19, wherein the pre-selected portion of the document comprises a graphic or other object.

29. (Original): The computer system of Claim 19, wherein the document comprises a spreadsheet document or file.

30. (Original): The computer system of Claim 19, wherein the document comprises a word processing document or file.

31. (Original): The computer system of Claim 22, further comprising the steps:
detecting or receiving a command to apply an interactive control to the pre-selected portion of the document; and
in response to detecting or receiving a command to apply an interactive control to the pre-selected portion,
coding an interactive control for the pre-selected portion, and
sending the interactive control to the recipient.

32. (Original): The computer system of Claim 31, further comprising the steps:
inserting the coded interactive control into the e-mail message with the coded pre-selected portion of the document so that the recipient can apply the interactive control to the pre-selected portion.

33. (Original): The computer system of Claim 31, wherein the interactive control comprises an ActiveX control.

34. (Original): The computer system of Claim 31, wherein the interactive control comprises information to enable a recipient viewing the content of the pre-selected portion to manipulate the content.

35. (Original): The computer system of Claim 31, wherein the interactive control comprises filtering, sorting, calculating, pivoting, and charting functions.

36. (Original): The computer system of Claim 31, wherein the interactive control comprises a spreadsheet application program function.

37. (Original): A computer-readable medium with instructions for automatically sending a pre-selected portion of a spreadsheet document to a recipient, having computer-executable instructions comprising:

R 3

- receiving a pre-selected portion of a document;
- determining content in the pre-selected portion of the document;
- in response to determining the content,
 - changing a user interface to correspond with the content;
- receiving a command through the user interface to send the pre-selected portion of the document to a recipient via electronic mail;
- in response to receiving the command to send the pre-selected portion of the document,
 - coding the pre-selected portion of the document for transmission via electronic mail,
 - launching an electronic mail application program, and
 - inserting the coded pre-selected portion of the document into an e-mail message;
- detecting a command to apply an interactive control to the pre-selected portion of the document;
- in response to receiving a command to apply an interactive control to the pre-selected portion,
 - coding an interactive control for the pre-selected portion, and
 - inserting the coded interactive control into the e-mail message with the coded pre-selected portion of the document so that the recipient can apply the interactive control to the pre-selected portion; and
- sending the coded pre-selected portion of the document and the interactive control to the recipient via electronic mail.

38. (Original): The computer-readable medium of Claim 37, wherein the pre-selected portion of the document is coded into HTML.

39. (Original): The computer-readable medium of Claim 37, wherein the user interface comprises a send button that corresponds to content of the pre-selected portion of the document and changes in response to the content of the pre-selected portion.

40. (Original): The computer-readable medium of Claim 37, wherein the pre-selected portion of the document comprises a data range comprising a single cell or multiple cells.

41. (Original): The computer-readable medium of Claim 37, wherein the pre-selected portion of the document comprises a table or pivot table.

42. (Original): The computer-readable medium of Claim 37, wherein the pre-selected portion of the document comprises a chart or pivot chart.

43. (Original): The computer-readable medium of claim 37, wherein the pre-selected portion of the document comprises a graphic or other object.

44. (Original): The computer-readable medium of Claim 37, wherein the document comprises a spreadsheet document or file.

45. (Original): The computer-readable medium of Claim 37, wherein the document comprises a word processing document or file.

46. (Original): The computer-readable medium of Claim 37, wherein the interactive control comprises an ActiveX control.

47. (Original): The computer-readable medium of Claim 37, wherein the interactive control comprises information to enable a recipient viewing the content of the pre-selected portion to manipulate the content.

48. (Original): The computer-readable medium of Claim 37, wherein the interactive control comprises filtering, sorting, calculating, pivoting, and charting functions.

49. (Original): The computer-readable medium of Claim 37, wherein the interactive control comprises a spreadsheet application program function.
